INDEX TO VOLUME XV.*

A

Academy, National, meeting at Washington, 491.
Agassiz, A., coral reefs of the tropical Pacific, 333.
Andrews, E. F., Botany all the Year Round, 334.
Argentino-Chilian Boundary, 331.

B

Baldwin, J. M., Development and Evolution, 88.
Barus, C., ionization of water nuclei, 105; ionization of water and phosphorus nuclei, 217; apertures of coronas, 335; diffusion of vapor into nucleated air, 472.
Bauer, L. A., Magnetic Declination Tables and Isogonic Charts, 1902, 157.
Bermuda Islands, Verrill, 332; zoology of, Verrill, 333.
Birds of North and Middle America, Ridgway, 418.

BOTANY.

Botanical Survey of San Jacinto Mts., Hall, 87.
Cyperaceæ, studies, xviii, Holm, 145.
Flora of the South Fork of Kings River, Eastwood, 86.
Fungus Diseases of Stone-Fruit Trees in Australia, McAlpine, 239.
Phycologia Boreali-Americana, Collins, Setchell and Holden, 239.
Plankton des Norwegischen Nordmeeres, Gran, 240.
Plants, electromotive force in, Plowman, 94.

Botany all the Year Round, Andrews, 334.
Boys radiomicrometer, Hutchins, 249.
Browning, P. E., ceric chromate, 177.
Brückner, E., die Alpen in Eiszeitalter, 238.
Burbank, J. E., surface tension and viscosity, 140.

C

California, botanical survey of San Jacinto Mts., Hall, 87.
— flora of Kings River, Eastwood, 86.
— Klamath Mountain section, Diller, 237, 342.
Campbell, H. D., meteoric iron from Virginia, 469.
Carnegie Institution, Washington, 492.
Chant, C. A., variation of potential along a wire transmitting electric waves, 54.
Chemie, physikalische, der Zelle, etc., Höber, 80.
Chemische Physiologie, Hofmeister, 235, 479.
Chemistry, Analytical, Treadwell, 479.
— Physical, Cohen, 326.

CHEMISTRY.

Anhydrous hydrosulphites, Moissan, 234.
Arsenic, antimony and tin, qualitative separation, Walker, 324.
— pentachloride, Baskerville and Bennett, 324.
Boric acid, solubility, Hertz, 235.
Cæsium, atomic weight, Richards and Archibald, 415.
Carbon, combustion of three varieties of, Moissan, 155.
— in steel, determination of, Sargent, 326.
Ceric chromate, Browning and Flora, 177.

* This Index contains the general heads, BOTANY, CHEMISTRY (incl. chem. physics), GEOLOGY, MINERALS, OBITUARY, ROCKS, ZOOLOGY, and under each the titles of Articles referring thereto are mentioned.

Cupric chlorides, ammoniacal, Bouzat, 155.
Electrolytic peroxide of lead, nickel, etc., Hollard, 325.
Fluorine, solid, Moissan and Dewar, 477.
Gaseous mixtures, combustion in, Pelet and Jomini, 477.
Hydrides, alkali-metal, Moissan, 154.
— non-conductivity of metallic, Moissan, 478.
— of rubidium and cæsium, Moissan, 477.
Hydrochloric acid, action on aluminum, etc., Recoura, 154.
Hydrogen peroxide, crystallized, Städel, 233.
Iron, preparation of pure, Skrabal, 235.
Oxidizing agents, new reaction for certain, de Koninck, 234.
Ozone, formation by electrical discharges, Warbury, 81.
Phosphorus, emanations of, Schmidt, 416.
— free, in meteorite, Farrington, 71.
Potash salts, Groth, 80.
Radium, properties, Giesel, 78.
— salts, heat evolved by, Curie and Laborde, 478.
Silver iodide, double salt of, Strömholm, 325.
Tellurium, radio-active, Marckwald, 154.
Thorium, radio-activity, Rutherford and Soddy, 79.
Uranium, radio-activity, Soddy, 78.
Vanadic acid, estimation of, Gooch and Gilbert, 389.
Chwolson, O. D., Lehrbuch der Physik, 82.
Clarke, F. W., pseudo-serpentine from Washington, 397.
Cockroaches, Paleozoic, Sellards, 307, 489.
Cohen, E., meteoric iron from the Soudan, 254.
Cohen, Ernst, Physical Chemistry, 326.
Colima, Mexico, eruption of, Sperry, 488.
Collins, F. S., Phycologia Boreali-Americana, 239.
Colorado, Rico Mts., ore deposits of, Ransome, 158.
Coronas, apertures of, Barus, 335.
Crater Lake, National Park, geology, Diller and Patton, 483.
Cumings, E. R., morphogenesis of Platystrophia, 1, 121.

D

Daly, R. A., mechanics of igneous intrusion, 269.
Davis, B., conductivity and energy absorption in the electrodeless discharge, 202.
Davis, H. N., Newton's colors shown by transmitted light, 224.
DeLaunay, L., Richesses Minérales de l'Afrique, 417.
Development and Evolution, Baldwin, 88.
Diamonds, see **Minerals**.
Dickson, C. W., platinum in the nickel-copper ores, Sudbury, Ontario, 137.
Diller, J. S., Klamath Mountain section, California, 342.
Dyar, H. G., North American Lepidoptera, 418.

E

Earthquake investigation committee, Japan, 239.
Eastwood, A., Flora of South Fork of Kings River, 86.
Eaton, G. F., Triassic fishes, collection at Yale, 259.
Electric conductivity of electrodeless discharge, Davis, 202.
— currents of low potentials, fatal effect, 236.
— properties of thin metal films, Patterson, 80.
— waves, variation of potential along wire transmitting, Chant, 54.
Electricity carried by a gaseous ion, Thomson, 327.
Electro-chemical analysis, Smith, 80.
Electrolytic determination of metals, use of rotating cathode, Gooch and Medway, 320.
Electro-Metallurgie, Bróchers, 80.
Electromotive force in plants, Plowman, 94.
Elkin, W. C., parallax of ten first magnitude stars in Northern hemisphere, 490.
Ether, can its motion cause double refraction? Rayleigh, 81.
Evans, N. N., native arsenic from Montreal, 92.
Ewell, A. W., rotatory polarization mechanically produced, 363.

F

Farrington, O. C., free phosphorus in meteorite, 71.

Fenneman, N. M., Lakes of southeastern Wisconsin, 238.
Flora, C. P., ceric chromate, 177.
Ford, W. E., rickardite, 69; chemical composition of axinite, 195.

G

Gardiner, J. S., Maldive and Laccadive Archipelagoes, 240. 489.
Gases, conductivity produced in, by ultra-violet light, Townsend, 415.

GEOLOGICAL REPORTS.

Louisiana, Harris, 330.
New Jersey, 1902, 483.
United States, 22d annual report, 157, 328. Bulletins 196-199, 237; Nos. 200-204, 328.
Vermont, 1901-1902, Perkins, 329.

GEOLOGY.

Alpen, die, in Eiszeitalter, Penck and Brückner, 238.
Brachiosaurus altithorax, Riggs, 299.
Cycadophyten, mesozoische, Nathorst, 85.
Dinosaur, largest known, Riggs, 299.
Elkhorn Mining District, Montana, Weed and Barrell, 158.
Ellensburg Folio, Washington, Smith, 328.
Eocene Mammalia in Marsh Collection, Wortman, 163, 399, 419.
Evolution of the horse, Gidley, Matthew, 161.
Flora, fossil, of the Arctic, Nathorst, 85.
Formations sedimentaires de Patagonia, Ameghino, 484.
Furmarole gases from Mount Pelée, Moissan, 233.
Geological structure of Bolson Plains, New Mexico, Keyes, 207.
— — of southwestern New England, Hobbs, 437.
Geology of Crater Lake, National Park, Diller and Patton, 483.
— and water resources of the Snake River plains, Idaho, Russell, 238.
Gold belt of Blue Mts., Oregon, Lindgren, 158.
John Day Basin, Oregon, fossil flora of, Knowlton, 328.
Klamath Mountain section, California, Diller, 237, 342.
Lead and zinc deposits, Ozark Region, Van Hise, Bain, Adams, 158.
Marine turtles, Wieland, 211.
Mylagaulodon, new rodent from Oregon, Sinclair, 143.
Niagara domes of northern Indiana, Kindle, 459.
Ore deposits of Monte Cristo, Washington, Spurr, 159; of Rico Mts., Colorado, Ransome, 158.
Paleozoic brachiopod, study of, Cumings, 1, 121.
— cockroaches, Sellards, 307. 489.
Platystrophia, morphogenesis of, Cumings, 1, 121.
Primates, Eocene, in Marsh Collection, Wortman, 163, 399, 419.
Triassic fishes, collection at Yale, Eaton, 259.
Urals, geology and petrography, 83.
Georgia, granites and gneiss of, Watson, 483.
Gilbert, R. D., use of zinc reductor in estimation of vanadic acid, 389.
Glacial formations of the Erie and Ohio Basins, Leverett, 160.
— geology of New Jersey, Salisbury, 418.
— period, cause of, True, 161.
Glaciers, periodic variations of, 160.
Goldschmidt, V., new forms of sperrylite, 83, 450.
Gooch, F. A., use of the rotating cathode in the electrolytic determination of metals, 320; use of zinc reductor in estimation of vanadic acid, 389.
Good seeing, Langley, 89.
Gratings, concave, Rollins, 49.
Gravitation energy, absorption by radio-active substances, Kaufmann, 415.
Groth, L. A., Potash Salts, 80.

H

Harrington, B. J., composition of some Canadian amphiboles, 392.
Hatcher, J. B., review of Ameghino's Patagonia, 484.
Hobbs, W. H., geological structure of southwestern New England, 437.
Höber, R., Physikalische Chemie der Zelle, etc., 80.
Hofmeister, F., Beiträge zur chemischen Physiologie, 235, 479.
Holden, I., Phycologia Boreali-Americana, 239.
Holm, T., studies in the Cyperaceæ, xviii, 145.
Horse, evolution of, Matthew, 161; tooth characters and revision of, Gidley, 161.

Howe, H. M., Metallurgical Laboratory Notes, 79.
Howe, J. L., meteoric iron from Virginia, 469.
Hutchins, C. C., Boys radiomicrometer, 249.

I

Idaho,—Snake River Plains, geology and water resources, Russell, 238.
Index Animalium, Sherborn, 334.
Indiana, Niagara domes of northern, Kindle, 459.
Ion, charge on, produced in air by Röntgen rays, Wilson, 416.
— gaseous, carrying electricity, Thomson, 327.
Ionization produced by corpuscles of radium, Darack, 480.
— of water nuclei, Barus, 105, 217.
Iron spectrum, photography of ultra-red, Lehmann, 156.

K

Keyes, C. R., geological structure of Bolson Plains, New Mexico, 207.
Kindle, E. M., Niagara domes of northern Indiana, 459.
Kundt, A., Experimental Physics, 481.

L

Langley, S. P., "Good seeing," 89; report of Smithsonian Institution, 242.
Leverett, F., Glacial formations of Erie and Ohio Basins, 160.
Light, interference of, Lummer and Gehrcke, 326.
Liquids, thickness of, by condensation, Parks, 480.
Loomis, H. B., change of temperature on permanent magnets, 179.
Louisiana, report on the geology, Harris, 330.

M

Magnetic Declination Tables and Isogonic Charts, 1902, Bauer, 157.
Magnetometer, torsion, Kohlrausch and Holborn, 236.
Magnets, change of temperature on permanent, Loomis, 179.
Maldive and Laccadive Archipelagoes, Gardiner, 240, 489.
Mann, C. R., Optics, 157.
Marsh Collection, studies of Eocene Mammalia in, Wortman, 163, 399, 419.
McAlpine, D., Fungus Diseases of Stone-Fruit Trees in Australia, 239.
Mechanics, Molecular Physics and Heat, Millikan, 327.
Medway, H. E. use of rotating cathode in electrolytic determination of metals, 320.
Metal films, electrical properties, Patterson, 80.
Metallic vapor, reversed lines of, 416.
Metallurgical Laboratory Notes, Howe, 79.
Meteorite, free phosphorus in, Farrington, 71.
— iron, Soudan, Cohen, 254; Virginia, Campbell and Howe, 469.
— stone, Andover, Mass., Ward, 395; Bath Furnace, Kentucky, Ward, 316.
Meteorites in the Vienna Museum, catalogue, Berwerth, 487.
Miers, H. A., Mineralogy, 84.
Millikan, R. A., Mechanics, Molecular Physics and Heat, 327.
Minérales de l'Afrique, les Richesses, De Launay, 417.
Mineralogy, Miers, 84.
Minerals, Tables of, Penfield, 330.

MINERALS.

Amphiboles, composition of some Canadian, 392. Anapite, 82. Arsenic, native, Montreal, 92. Axinite, composition, 195.
Brunsvigite, 417.
Chalmersite, Brazil, 83.
Diamonds, artificial, from fused silicates, 153; fluorescence and phosphorescence, 153.
Hudsonite, 227.
Koenenite, 83.
Liveingite, 417.
Platinum in the nickel-copper, Sudbury ores, Ontario, 137. Pyknochlorite. 417.
Quartz, expansion of melted, Holborn and Henning, 236.
Rickardite, new, Vulcan, Colorado, 69.
Serendibite, Ceylon, 417. Serpentine, pseudo-, Washington, 397. Sperrylite, new forms, Ontario, 83, 450.
Montana, Elkhorn Mining District, Weed and Barrell, 158.
Mt. Pelée, fumarole gases from, Moissan, 233; eruption, Anderson and Fleet, 489.

N

Nathorst, A. G., Fossile Flora der Polarländer, 85; Mesozoische Cycadophyten, 85.

New Jersey geological survey, 1902, 483; Glacial Geology, Salisbury, 418.
New Mexico, geological structure of Bolson Plains, Keyes, 207.
Newton's colors shown by transmitted light, Davis, 224.
New York State Museum, 481.
Nicol, W., new forms of sperrylite, 83, 450.
Nuclei, ionization of water, Barus, 105, 217.
